## REFERENCES

## PROFILE

Highly motivated self-taught frontend developer with a passion for creative problem-solving. I thrive on quickly grasping new concepts and technologies, demonstrated by my hands-on approach to building personal websites and diving deep into code. Eager to leverage a proactive drive for learning and to gain practical experience, making a meaningful impact within a dynamic development team.

## TECHNICAL SKILLS & PROJECTS

### Frontend Web Development

- Proficient in HTML5, JS, CSS3 & Tailwind CSS: Successfully developed and styled responsive personal and demo websites, showcasing a strong understanding of core web design principles.
- Actively learning JavaScript to implement dynamic and interactive user interfaces.
- Development Tools: Experienced in Visual Studio Code for efficient coding. Also utilizes Visual Studio for C# development (Unity Games) & WPF Apps for Game Launchers.
- Portfolio: Designed and built a dedicated portfolio website to showcase web development skills and projects.

### Other Technical Skills

- App & Game Development: Currently developing a Windows game launcher (WPF/XAML) and creating games in Unreal Engine using Blueprints, with plans to learn C++.
- PC Building & Troubleshooting: Skilled in assembling custom PCs from components, including performance optimization and troubleshooting hardware issues.
